

GREEN
SLEEVES
UPCYCLED FURNITURE

What do we do?

Green Sleeves was born out of a profound commitment to sustainability and environmental responsibility. Recognizing the mounting challenge of construction site and household waste, we envisioned a solution that could breathe new life into discarded materials. Instead of allowing these waste products to contribute to overflowing landfills and environmental degradation, we create elegant furniture and home decor. By doing so, we not only reduce waste but also create **sustainable and unique pieces that tell a story** of redemption and eco-conscious innovation. Our mission with Green Sleeves is to inspire a shift in perspective, proving that with creativity and commitment, what was once considered 'waste' can be reinvented into something beautiful and functional.
